

GEOTECHNICS PRODUCT OVERVIEW

Many different products,
many possibilities

HEIDELBERGCEMENT

EXPERTISE IN NATURE AND ENGINEERING

We also set standards in production and processing: gentle mining and environmentally-friendly manufacturing processes are a matter of course for us. Our products are developed specifically to customer requirements and are the first choice in special civil engineering and geotechnics. Our experts are on hand to give you professional support and advice in the search for the right solutions for you.

BACKFILLING AND GROUTING MATERIALS

PRODUCT LINE	Applications
DÄMMER®	Cavity backfilling
	Injection
	Grouting
MIXXAN®	Mining damage restoration
	Drift backfilling
	Steel mill backfilling
BLITZDÄMMER®	Cavity backfilling
	Injection
BRUNNEN-DÄMMER®	Grouting
	Annular space sealing in well sinking

THIN DIAPHRAGM AND DIAPHRAGM WALL MATERIALS

PRODUCT LINE	Applications
DIWA-MIX®	Remediation of contaminated sites
	Diaphragm walls
	Funnel & gate systems
SEKU-MIX®	Excavation sealing
	Dyke construction
	Diaphragm walls
SWM	Dyke construction
	Remediation of contaminated sites
GROUND-MIX®	Excavation sealing
	Dyke construction

HEAT-CONDUCTING MATERIALS

PRODUCT LINE	Applications
CABLECEM®	Filling material with low thermal resistivity for cables used in jacket tube systems
CABLEGEL	Filling material with low thermal resistivity for cables used in jacket tube systems
POWERCRETE® PREMIX	Bedding material with low thermal resistivity for buried cables in open trenches
THERMOCEM®	Heat-conducting grout for backfilling of geothermal probes.

EVERY NEW BUILDING PROJECT ENTAILS PARTICULAR TECHNICAL REQUIREMENTS FOR THE ENGINEERS IN CHARGE OF DESIGN AND COMPLETION.

OUR PRODUCTS ARE A GUARANTEE FOR FIRSTCLASS RESULTS.

GROUTING

PRODUCT LINE	Applications
JET-MIX®	Ground stabilisation
	Jet grouting
	Underpinning construction

HORIZONTAL DRILLING

PRODUCT LINE	Applications
DRILL-MIX®	Self-setting drilling fluid for HDD

One step ahead

We regard ourselves as a professional and reliable partner. Together with our customers, we develop innovative solutions for the special challenges posed by special civil engineering.

- Tailored and professional advice
- Fast and flexible delivery
- Strong compliance with performance schedules
